

RC D&D 3

CASING SCRUBBER FOR WELL COMPLETION OPERATIONS

Description

RC D&D 3 is a select blend of surfactants in an aqueous solution designed to displace and clean water base, diesel and mineral oil base drilling fluids prior to completion operations. RC D&D 3 removes mud, sand, oil, and polymer from all surfaces including workstring, casing, riser, tanks, pumps, lines, and shale shakers and other surface equipment.

Typical Physical Properties

Appearance	Clear Green
Odor	Characteristic
Specific Gravity @ 60° F	1.027
Density (lbs /gallon)	8.6
Flash Point	> 200° F
pH	7.45

Advantages

- RC D&D 3 thoroughly cleans workstring, casing, riser, and surface equipment prior to completion operations. Its use reduces or eliminates the need for filtering brine completion fluids.
- When used as directed and tested according to the U.S. Environmental Protection Agency's Static Sheen Test, RC D&D 3 does not form or create a sheen on the surface of receiving waters.

Application

Please consult a Rig-Chem Representative for an engineered displacement procedure.

Handling

Improper handling of this product can be injurious to workers. Observe all safety precautions shown on the label and in the Material Safety Data Sheet.
